

GROWING ADVICE:

- Should be grown as a high yielding feed. Seed rate should allow for tillering
- Nitrogen amount and timings should be aimed at yield and according to location and residual levels of N
- Fungicides should be aimed at all of the major diseases, timing of these are also critical to keep disease levels down

CONFIRMED POINTS:

- Good yields
- Good specific weight
- BaYMV resistance

UNIQUE SELLING POINTS (USP)

- High untreated yield
- Excellent brown rust resistance
- Good standing

JORDAN

Cross: (KWS-Discovery x Matros) x KWS-Discovery

CROP: WINTER BARLEY

GROUP: 2 ROW FEED

STATUS: RL 2020

	Jordan	103.4
