

GENERAL COMMENT

- Bennington has shown excellent results in areas of high Septoria Tritici pressure i.e. The south west of UK.
- Bennington has also shown high early vigour which has shown good results in out competing black grass in the spring in Agrii trials.
- Variety suits areas with high Septoria pressure, fungicides should ensure good activity against Yellow Rust as well as good timings.

CONFIRMED POINTS

- Tall variety with good standing.
- Good Septoria resistance.
- High Specific weight.

BENNINGTON
